**To: Graduate Admissions Committee**

Department of Computer Science

Stanford University

Stanford, CA 94305, USA

**Re: Letter of Recommendation for Mx. Feathbow Shang****Dear Members of the Admissions Committee,**

I recommend Mx. Feathbow Shang for admission to your Ph.D. program in Computer Science. Feathbow stands firmly within the top 5% of their cohort, exhibiting a rare blend of theoretical depth and engineering pragmatism.

I first encountered Feathbow in my graduate-level course, “Advanced Algorithms and Data Structures,” a module known for its heavy reliance on mathematical proofs and computational complexity analysis. They demonstrated an intuitive grasp of the underlying principles and secured a final grade of 95/100, ranking second in a class of 140 students.

Feathbow’s research potential became evident when they joined my laboratory in the summer of 2023 to assist with a project funded by the National Natural Science Foundation of China (NSFC), focused on “Real-time Fluid Simulation for Interactive Graphics.” Feathbow was tasked with optimizing the performance of our SPH-based solver. They analyzed cache-miss patterns in the neighbor search algorithm, identified memory access bottlenecks, and implemented a spatial hashing approach with SIMD vectorization. The result was a quantified 37% speedup in frame rendering time without compromising physical accuracy.

Feathbow is a valued member of our academic community at the Peiyangyuan Campus. They are an excellent collaborator and their command of technical English is excellent.

They possess the intellectual curiosity and technical rigor required to thrive in a top-tier research environment. I am confident that they will be a productive researcher from day one. I recommend them to you without reservation.

Sincerely,

**Dr. San Zhang***Professor*

College of Intelligence and Computing

Tianjin University
